Skills and Tools

- Functional, non-functional, regression testing
 - Oracle SQL developer, SQLite client
 - JIRA, Confluence
 - Git, Gerrit
 - SharePoint, OneNote
 - Excel 2016, Word 2016, Office Online
 - Jenkins, AWS S3
 - Skype, Skype For Business, Spark, Webex
 - Map Viewer (like GoogleEarth), RDF Viewer (like ArcMap), own test frameworks
 - Java, Python, Selenium
- Languages:**
- **German:** B2
 - **English:** Upper-Intermediate (B2)
 - **Russian:** Native
 - **Ukrainian:** Native

Experience

2017.02 – 2018.10

Manual QA Engineer / Luxoft, Ukraine

Project: Compiler of digital maps

Description: Project produces maps based on NDS standard. Project contained from 50+ people, 6 teams working in different operational frameworks (Large-Scale Scrum, Kanban).

Release testing team:

- Team size - 3 people
- Goal: to ensure that ready for release product does not contain severe unknown issues

Responsibilities:

- Checklists creation and maintenance
- Bug reports analysis and actualization
- Bugfix verification (confirmation) on release version of a product
- Creation of test summary report with statistics information

- Creation of urgent bug reports for failures blocking product creation
- Collaboration with development teams and product owner
- Execution of test cycles and creation of test case execution report
- Creation of bug reports based on automated tests results and manual exploration in visualization tool and SQLite databases

QA embedded in development team:

- Team size - 11 people
- Goal was to test developed functionality, provide feedback to developers, ensure there are no regressions or undesired side-effects and in general act as last quality gate before code integration into release branch.

Responsibilities:

- Test cases design
- Execution of tests on Jenkins
- Manual verification of bugfixes in SQL database
- Automated verification of bugfixes in daily builds
- Analysis of specification and customer requirements
- Execution of Java- and Python- based test framework locally
- Analysis test execution results on correctness of:
 - test implementation and test logic
 - error message
 - correctness in DB
 - acceptance criteria
 - test run time
- Quick creating SQL query to combine information from big amount of DB
- Collaboration with other team testers, developers, team lead and product owner, as well as other teams
- Participate in daily team standups and QA meetings.
- Implementation of simple test cases (in Java) and participation of other tester's code reviews.

Certifications

2019

ISTQB certified tester / Foundation level

Education

2009 - 2015

Specialist degree / Odessa State Medical University, Ukraine

Medical Care department

Other work experience

2015.08 – 2017.06

Doctor-intern / The Filatov Institute of Eye Diseases and Tissue Therapy of the NAMS of Ukraine, Ukraine

- Job responsibilities:
- Keeping medical records
 - Assistance at surgery operations
 - Patient consultancy

2012.08 – 2015.06

Nurse / The Filatov Institute of Eye Diseases and Tissue Therapy of the NAMS of Ukraine, Ukraine

- Job responsibilities:
- Keeping medical records
 - Conducting medical procedures, injections

Activities

2018.02 – 2018.06

Trainings and Courses / Hillel school

- Java for QA
- QA Automation

2017.01 – 2017.03

Trainings and Courses / IQSpace & SteelKiwi

- Python programming course

2017.02 – 2017.09

Trainings and Courses / Luxoft internal trainings

- SQA-037 Introduction to SQL for Testers
- SQA-040 Mobile Applications Testing Peculiarities
- DEV-007 Introduction to git
- SDP-004 Basics of Agile Methodology for Software Development

Books have read

- Foundations of Software Testing (Rex Black)
- A Practitioner's Guide to Software Test Design (Lee Copeland)
- Software Testing Base Course (Svyatoslav Kulikov)
- Testing dot com (Roman Savin)

Video courses on Lynda.com

- Learning Paths - Master Excel 2016
- Learning Paths - Become a Java Developer
